WORK EXPERIENCE

6y 9m(Total)

UX Design Lead, DuPont Speciality Products

Aug '24 - Present (1y 2m)

- Own the complete end-to-end UX for WavePro, a SaaS platform that simplifies engineering calculations for large-scale water projects worldwide.
- Partner with PMs, engineers, and subject-matter experts to translate highly technical requirements into structured user stories, detailed flows, and validated design deliverables.
- Lead ideation and alignment workshops to shape user journeys, capture success metrics, and build consensus around design directions.
- Craft intuitive workflows, guided interactions, and context-aware messaging systems that reduce user friction and enhance task efficiency.
- Establish a consistent visual language and tone-of-voice across connected tools, leveraging AI-assisted UX copy generation for accuracy and tone.
- Contribute to design reviews and documentation to drive shared understanding and maintain quality across all releases.

Design Manager, Jio Matrix, Reliance JPL

Feb '22 - Jul '24(2y 7m)

- Directed design for JECS (Edge + Cloud) and ChargeIT, defining complex workflows and dashboards used by millions of internal and enterprise users.
- Partnered with PMs and engineering to define access management, billing, and subscription journeys aligned with both user goals and business KPIs.
- Designed and scaled JioCoupons, a rewards marketplace that distributed over 1.6 billion coupons across 160 brands (FY 22-23) and delivered a Shopify PoC for small-business onboarding.
- Developed and documented component standards, usability patterns, and accessibility guidelines to promote consistency across all digital properties.
- Facilitated cross-functional design reviews, validation sessions, and stakeholder workshops, reinforcing collaboration and continuous product improvement.

Interaction Designer (Consultant), Dell

Dec '20 - Jan '22 (1y 1m)

- Unified Dell's global masthead across e-commerce platforms, ensuring full responsiveness, accessibility, and consistent brand alignment.
- Defined breakpoint rules and adaptive layouts for desktop and touch devices, and documented detailed specifications for developers.
- Enhanced the search experience using Baymard research insights, improving product discoverability and customer task completion.

Product Designer, Mindhouse

Jul '20 - Oct '20 (4m)

- Redesigned the Mindhouse app during its pivot to live digital meditation classes, improving discoverability and session booking.
- Introduced habit-building reminders and streamlined onboarding, helping users engage consistently and build daily mindfulness routines.

UX Design Intern, Microsoft

May '19 - Jul '19 (2m)

- Conducted user research on mobile device security awareness and translated findings into the first iOS version of Windows Defender, designed and shipped within 4 weeks.

UI/UX Designer, TCS

Jan '17 - Aug '18 (1y 7m)

- Audited and overhauled UI components of Fresco Play, a learning platform for TCS and other organizations. Designed animated tutorials for learning concepts (e.g., API).
- Created a crowdsourced ideation platform for Singapore Airlines, involving employees and stakeholders in decision-making.

EDUCATION

M.Des in Interaction Design

IDC School of Design, 2018-20

COURSES

Agile meets Design Thinking

Prompt Engineering for ChatGPT

Introduction to Generative AI

SKILLS

Core Skills

UX Research · Information Architecture · Interaction Design · Prototyping · Usability Testing · Design Systems · Accessibility

Tools

Figma · FigJam · Adobe CC · Miro

RECOGNITION

Best Innovator Award — Jio Matrix Conf'23
